

CONCORDIA UNIVERSITY

DEPARTMENT OF
COMPUTER SCIENCE AND SOFTWARE ENGINEERING

COMP 6231, Fall 2018

Instructor: R. Jayakumar

ASSIGNMENT 3

Issued: Nov. 12, 2018

Due: Nov. 25, 2018

***Note:** The assignments must be done individually and submitted electronically.*

**Web Service Implementation of the
Distributed Course Registration System (DCRS)**

In this assignment, you are going to implement the Distributed Course Registration System (DCRS) from **Assignment 2 as a web service**. Specifically, design the service from Assignment 2 (**using the same functions and exceptions**) by doing the following:

- Extract the Java client-server implementation by removing the CORBA specific code from your Assignment 2.
- Properly annotate your Java implementation to adapt it as a web service.
- Build the end point files using the ws-gen command before publishing the service.
- Import the wsdl files using the wsimport command.

Your server design should **maximize the concurrency** in the application. In other words, use proper synchronization that allows multiple guests/managers perform the operations at the same time.

Marking Scheme

[30%] Design Documentation: Describe the techniques you use and your architecture, including the data structures. Design proper and sufficient test scenarios and explain what you want to test. Describe the most important/difficult part in this assignment. You can use UML and text description, but limit the document to 10 pages. Submit the documentation and code by the due date; print the documentation and bring it to your demo.

[70%] Demo in the Lab: You have to register for a 5–10 minute demo. Please come to the lab session and choose your preferred demo time in advance. You cannot demo without registering, so if you did not register before the demo week, you will lose 40% of the marks. Your demo should focus on the following.

[50%] Correctness of code: Demo your designed test scenarios to illustrate the correctness of your design. If your test scenarios do not cover all possible issues, you'll lose part of mark up to 40%.

[20%] Questions: You need to **answer some simple questions** (like what we've discussed during lab tutorials) during the demo. They can be theoretical related directly to your implementation of the assignment.

Questions

If you are having difficulties understanding sections of this assignment, feel free to email the teaching assistant (Ms. Kritika Sharma at sh.kritika01@gmail.com or Mr. Pranav Bhatia at pb.comp6231@gmail.com). It is strongly recommended that you attend the tutorial sessions which will cover various aspects of the assignment.
